SUMMARY

I am a highly skilled Front End developer with a strong industry background in building websites, web applications, and hybrid mobile applications. My expertise lies in JavaScript, and I possess professional experience working extensively with React.js and Redux.

Throughout my career, I have successfully leveraged React.js and Redux to create dynamic and interactive user interfaces, ensuring seamless user experiences and optimal performance. I have a deep understanding of React.js principles and best practices, enabling me to efficiently develop scalable and maintainable codebases.

In addition to React.js, I have hands-on experience with Vue.js, Node.js, and React Native. This diverse skill set allows me to adapt to different project requirements and deliver high-quality solutions across multiple platforms.

With a strong focus on code quality and best practices, I am passionate about creating clean and efficient code that is easily maintainable and scalable. I continuously stay updated with the latest industry trends and emerging technologies to ensure that my development approach remains cutting-edge and aligned with industry standards.

I thrive in collaborative environments and have a proven track record of effectively collaborating with cross-functional teams, including designers, backend developers, and project stakeholders. This collaborative approach enables me to understand project goals and deliver innovative solutions that meet both technical requirements and user needs.

Overall, my extensive experience in Front End development, specialized in JavaScript with a focus on React.js and Redux, combined with my proficiency in Vue.js, Node.js, and React Native, positions me as a versatile and valuable asset for any web or mobile development project.

WORK EXPERIENCE

Senior Software Engineer
Jul **2022** - Present -

Axiamatic - Stealth Startup

📍 Bengaluru, IN

- Integrated cache based hook to handle API request caching and handling in the FrontendDeveloped and implemented an integrated cache-based hook in React to efficiently handle API request caching and management in the frontend.
- Integrated Vite and Vitest libraries to handle code bundling and testing in a frontend application. .
- Added ESLint and TypeScript rules to ensure adherence to coding standards.

Technology, lead
Jun **2016** - May **2022**

Gale partners

📍 Bangalore, India
